

Introduction

In the current world, peace can no longer be taken for granted. In Luxembourg, we are often confronted in daily life to constant provocation, wickedness, arrogance and quarrels in families, between neighbours or amongst colleagues.

For 6 years now, Germaine, my neighbour and myself, have been fighting for **dialogue** and **transparency** and for a **better quality of life** in our “commune”.

“Fear is a bad advisor !” The Non-Luxembourgers and the Luxembourgers should not be afraid of losing their identity, because they pursue the **same democratic values** : a better quality of life, security, justice, peace, respect of human rights, order and discipline which are also part of our “Nation Branding”. All of this under the motto : **Solidarity**.

Diversity is our strength

In the world of today full of trouble and conflicts, more bridges than walls should be built. The Wormer Municipality needs to have an open ear for all its citizens. The well-being of the entire population must be their primary concern !

If you abstain, you're resisting change.
We can only do it together. There is no other way.

Moien, ech sinn d'Christiane !
